

WORDEN DOMESTIC SHIPPING INFORMATION

IMPORTANT: Please contact Worden prior to shipping.

Please ship the meter in 2 pieces:

- 1) Meter element (Worden wooden shipping case foam lined)
- 2) Meter case (Worden metal cylindrical carrying case padded)
- 3) Worden Geodetic gravity meters require geodetic dial to be included with meter shipment.

Please mark containers fragile with arrows up.

Option: We recommend insurance on the element portion and the outside meter case. These pieces are shipped in separate containers, so it is advised you value each piece separately using separate air waybills. Insurance is the responsibility of meter owner.

Worden meter owner is responsible for all shipping charges, including any taxes, if applicable.

All shipping or related charges paid by Worden Gravity shall be immediately reimbursed to Worden Gravity Meter Company by meter owner upon receipt of invoice from Worden. This invoice and related payment shall be separate from final invoice for service and or repair charges.

Worden gravity meter owner ships instrument to Worden Gravity Meter Company at his own risk. Worden cannot guarantee meter is serviceable or repairable. Worden cannot be responsible for theft and or damage to the gravity meter in route to or from our facility or while meter is in our facility.

Worden will quote standard service for your meter prior to you shipping it; however, upon receiving gravity meter, should the inspection and testing indicate additional service and repairs are necessary, this will require authorization by meter owner prior to commencing any service or repairs on the meter.

Should you have any questions, please contact Worden Gravity Meter Company.

Thank you,

Dennis Rohan
Service Manager
